Are you a student with a disability, medical, mental health or learning condition? Would you benefit from specialised peer mentoring to assist you in navigating University life and achieving your full potential?

Peer support and goals would be collaboratively developed between yourself and mentor but could focus on or include some of the following:

- Managing your time and workload
- Finding your way around the on-line environment
- Developing effective study plans/skills
- Communicating effectively with academic staff
- Awareness of University services and how to access them
- Developing social skills and networks

If you are interested please email Julie at DisabilityMentoring@curtin.edu.au
