### Unit 0: Academic Integrity at Curtin

## Purpose of the Academic Integrity Program (AIP)

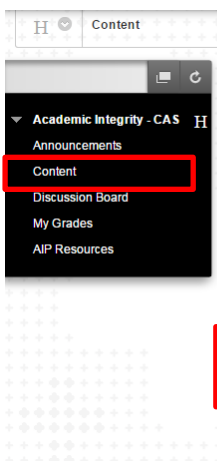

Learning outcomes: By the end of this section you will understand the purpose of this Academic Integrity Program.

### Think about this scenario:

Kellie, Lu and Mary (third years) were assigned a research project and were required to estimate how much each person helped with the project. Mary did very little work because she was sick, but was close friends with Lu who did a lot of extra work.

Lu wanted the group to claim that everyone did the same amount of work because Mary could not help being sick, and knew that she would have done the work if she was well. Kellie was not happy about this but felt pressured to agree to it. They each signed the form to claim equal contribution but later, Kellie complained to the lecturer about being coerced into it.

**Do you think Kellie, Mary and Lu upheld academic integrity?**

### Content
